EDUCATION

Cal Poly Humboldt — Arcata, CA | B.S. in Computer Science

Expected May 2028

- **GPA: 3.94** | Presidential Scholar | Dean's List (Every Term)
- **Relevant Coursework:** Systems Programming (CS 375), Data Structures (CS 211), OOP (CS 112), Web-Apps Using Databases (CS 328), Database Design (CS 325), Computer Architecture (CS 243)

TECHNICAL SKILLS

- **Languages & Tools:** Python (FastAPI), C/C++, Java, SQL, React, JavaScript/TypeScript, Node.js, Terraform, Git/GitHub
- **Systems & AI/ML:** Full-Stack GenAI, Retrieval-Augmented Generation (RAG), Linux Internals, POSIX APIs, Unix System Calls (fork, exec, wait), PGVector, Supabase, Alembic, Real-time Streaming (TouchDesigner/ComfyUI), Audio Voice Synthesis and training (RVC, Google Colab, & Applio)
- **Certifications & Languages:** Anthropic AI Fluency, Anthropic Claude 101 | Bilingual (Fluent English, Conversational Spanish)

TECHNICAL PROJECTS

Full-Stack RAG Document Q&A Tool — Python (FastAPI), React, Supabase, PGVector, Alembic

Jun 2026 – Present

- Architected an end-to-end investment research chat application with a real-time streaming layer.
- Designed a robust PostgreSQL data model with PGVector embeddings and Alembic migrations.
- **Trust Contract:** Implemented a page-level citation pipeline to guarantee grounded, verifiable responses.
- *Full system architecture, schema designs, and live Railway deployment demo available on portfolio.*

Custom UNIX Command Shell & Systems Portfolio — C, POSIX, Linux Internals

Fall 2026 – Present

- Developing a custom, UNIX-compliant shell interpreter in C to handle system-level process execution.
- Managing parent-child process lifecycles via POSIX system calls (fork, exec, wait) and custom signal handlers (SIGINT).
- *Process diagrams, memory leak profiling (Valgrind), and source code available on portfolio.*

Learning Engine — Hackathon for Social Good — React, Node.js, JSON

Mar 2026 – Present

- Co-developed a full-stack study tool allowing instructors to generate dynamic quizzes using no-code JSON schemas.
- **Outcome:** Identified and resolved a database latency bottleneck during the final sprint of live development.
- *Setup guides, teacher UX wireframes, and project reflection available on portfolio.*

LeetCode Grind 75 & Systems Homelab — Algorithms, Networking, Linux Admin

Summer 2026 – Ongoing

- Solved all 75 Grind 75 problems to master core data structures and algorithmic patterns.
- Administer multi-user Linux game servers, debugging networking ports and mod-compatibility issues.

PROFESSIONAL EXPERIENCE

Cal Poly Humboldt Library — Library Scholar Intern (Terraform Project)

Feb 2026 – May 2026

- Rebuilt a physical AR sandbox from scratch, routing Kinect depth camera inputs to an AI StreamDiffusion pipeline.
- Collaborated across IT and management teams to resolve architecture bugs, releasing the code under an MIT License.
- *Amsterdam-guided design brief, hardware wiring guides, and full reflection available on portfolio.*

Ramy Dickinson Construction — Contractor Apprentice

Summer 2023 – Present

- Manage materials, job-site logistics, and daily operations requiring independent, real-time decision-making.

LEADERSHIP & COMMUNITY

- **President, Spanish National Honor Society:** Organize community initiatives to bridge English- and Spanish-speaking members.
- **Aviation Club Webmaster:** Built and optimized the club website to support recruitment and community airport events.
- **Community Volunteer:** Over 100 volunteer hours with the Veterans' Hall, Trails Steward, and Trinidad Coastal Land Trust.
